BUSINESS OUTCOME — COST AVOIDANCE (\$M / QUARTER)

Automation + early defect removal avoided \$9.6M in rework, incident & downtime cost this quarter.

QUARTER WINS

- Achieved **DORA Elite** across the platform — first time in program history.
- Cut customer-impacting incidents **40%**; zero Sev1 in 3 of 6 months.
- Defect Removal Efficiency to **94%**; escaped defects down 82%.
- Release predictability **94%** — 17 of 18 trains shipped on date.

RISKS & WATCH ITEMS

- 2 high-severity security findings open — hotfix train committed for July.
- Mobile BFF error budget at 9% — reliability review scheduled.
- UI/E2E automation at 61% — investment case approved for Q3.

Q3 STRATEGIC FOCUS

- Shift-left security: SAST/DAST gates blocking, target 0 high at release.
- Lift UI/E2E automation 61% → 75%; cut lead-time review stage in half.
- Phase 3 AI: LLM-assisted test generation & flaky-test auto-triage pilot.
- Resilience: chaos-engineering program for top-7 services.
